# Leadership

**Jesse Davis, Co-Founder**

Since 2002, Jesse has led hundreds of technology projects stretching across a wide range of industry verticals. From managing large-scale web and mobile app builds to developing LAMP and MEAN stack systems, he has been at the forefront of emerging creative technologies. Jesse currently manages Expedition Co.'s finances and technical operations and works directly with clients such as Hyundai, Hewlett-Packard, and Yahoo!

**Isaac Swiderski, Co-Founder**

Isaac has spent the last eight years leading teams in innovative technologies within the web and mobile tech space, specializing in administering the design and front-end development processes. Isaac recently managed accounts for industry leaders like Carey International, Porsche, MasterCard, and Verizon. Previous to his work at Expedition Co., Isaac was the Head of Production at Blend.

**Sean Klosky, CTO**

A seasoned Technology leader responsible for all company technology and technological resources. Dedicated to establishing technology vision, strategy, culture and growth plan. A leader in software development, system design and quality assurance processes. Sean has a deep understanding of e-Commerce, Automotive Sites and Mobile Applications.

## Global sales training – modernized

Accessible on mobile, dynamic video content, real-time updates, easy and intuitive search navigation – these are just a few features that have become standard for content delivery platforms, regardless of what content is being provided to the end user. Unfortunately, Hyundai’s proprietary internal content delivery system supported none of these features. This resulted in increasingly frustrated sales personnel who desperately needed continuous, reliable access to their sales tools and product information. Expedition Co. was called upon by Hyundai’s Sales Training division to overhaul this entire internal content delivery platform and build in its place, a modern, sophisticated tool that its nationwide sales associates could depend on.

# Hewlett-Packard

## Overhauling and automating outdated government systems

Even when something has been done a certain way for a long time (a very long time), there is always room for improvement. HP's New Zealand office recognized this and looked to make a giant leap forward in their sales process. In the summer of 2019, HP NZ hired Expedition Co. to rebuild their All-of-Government purchasing portal and bring automation, real-time updates, and modern UX to what previously was an over-complicated, archaic ordering system that frustrated its users (government employees).

# Beatstoc

## Reinventing the artist/fan relationship

Beatstoc is the brainchild of a team that’s witnessed a massive shift in the music industry first-hand. Artists are getting screwed in the age of streaming. Fans want more engagement in the age of social media and more intimate access to the artists they love. How can we facilitate a healthier ecosystem; one that mutually benefits the artists and fans alike? Beatstoc is positioning itself to be that solution.

# Theorem

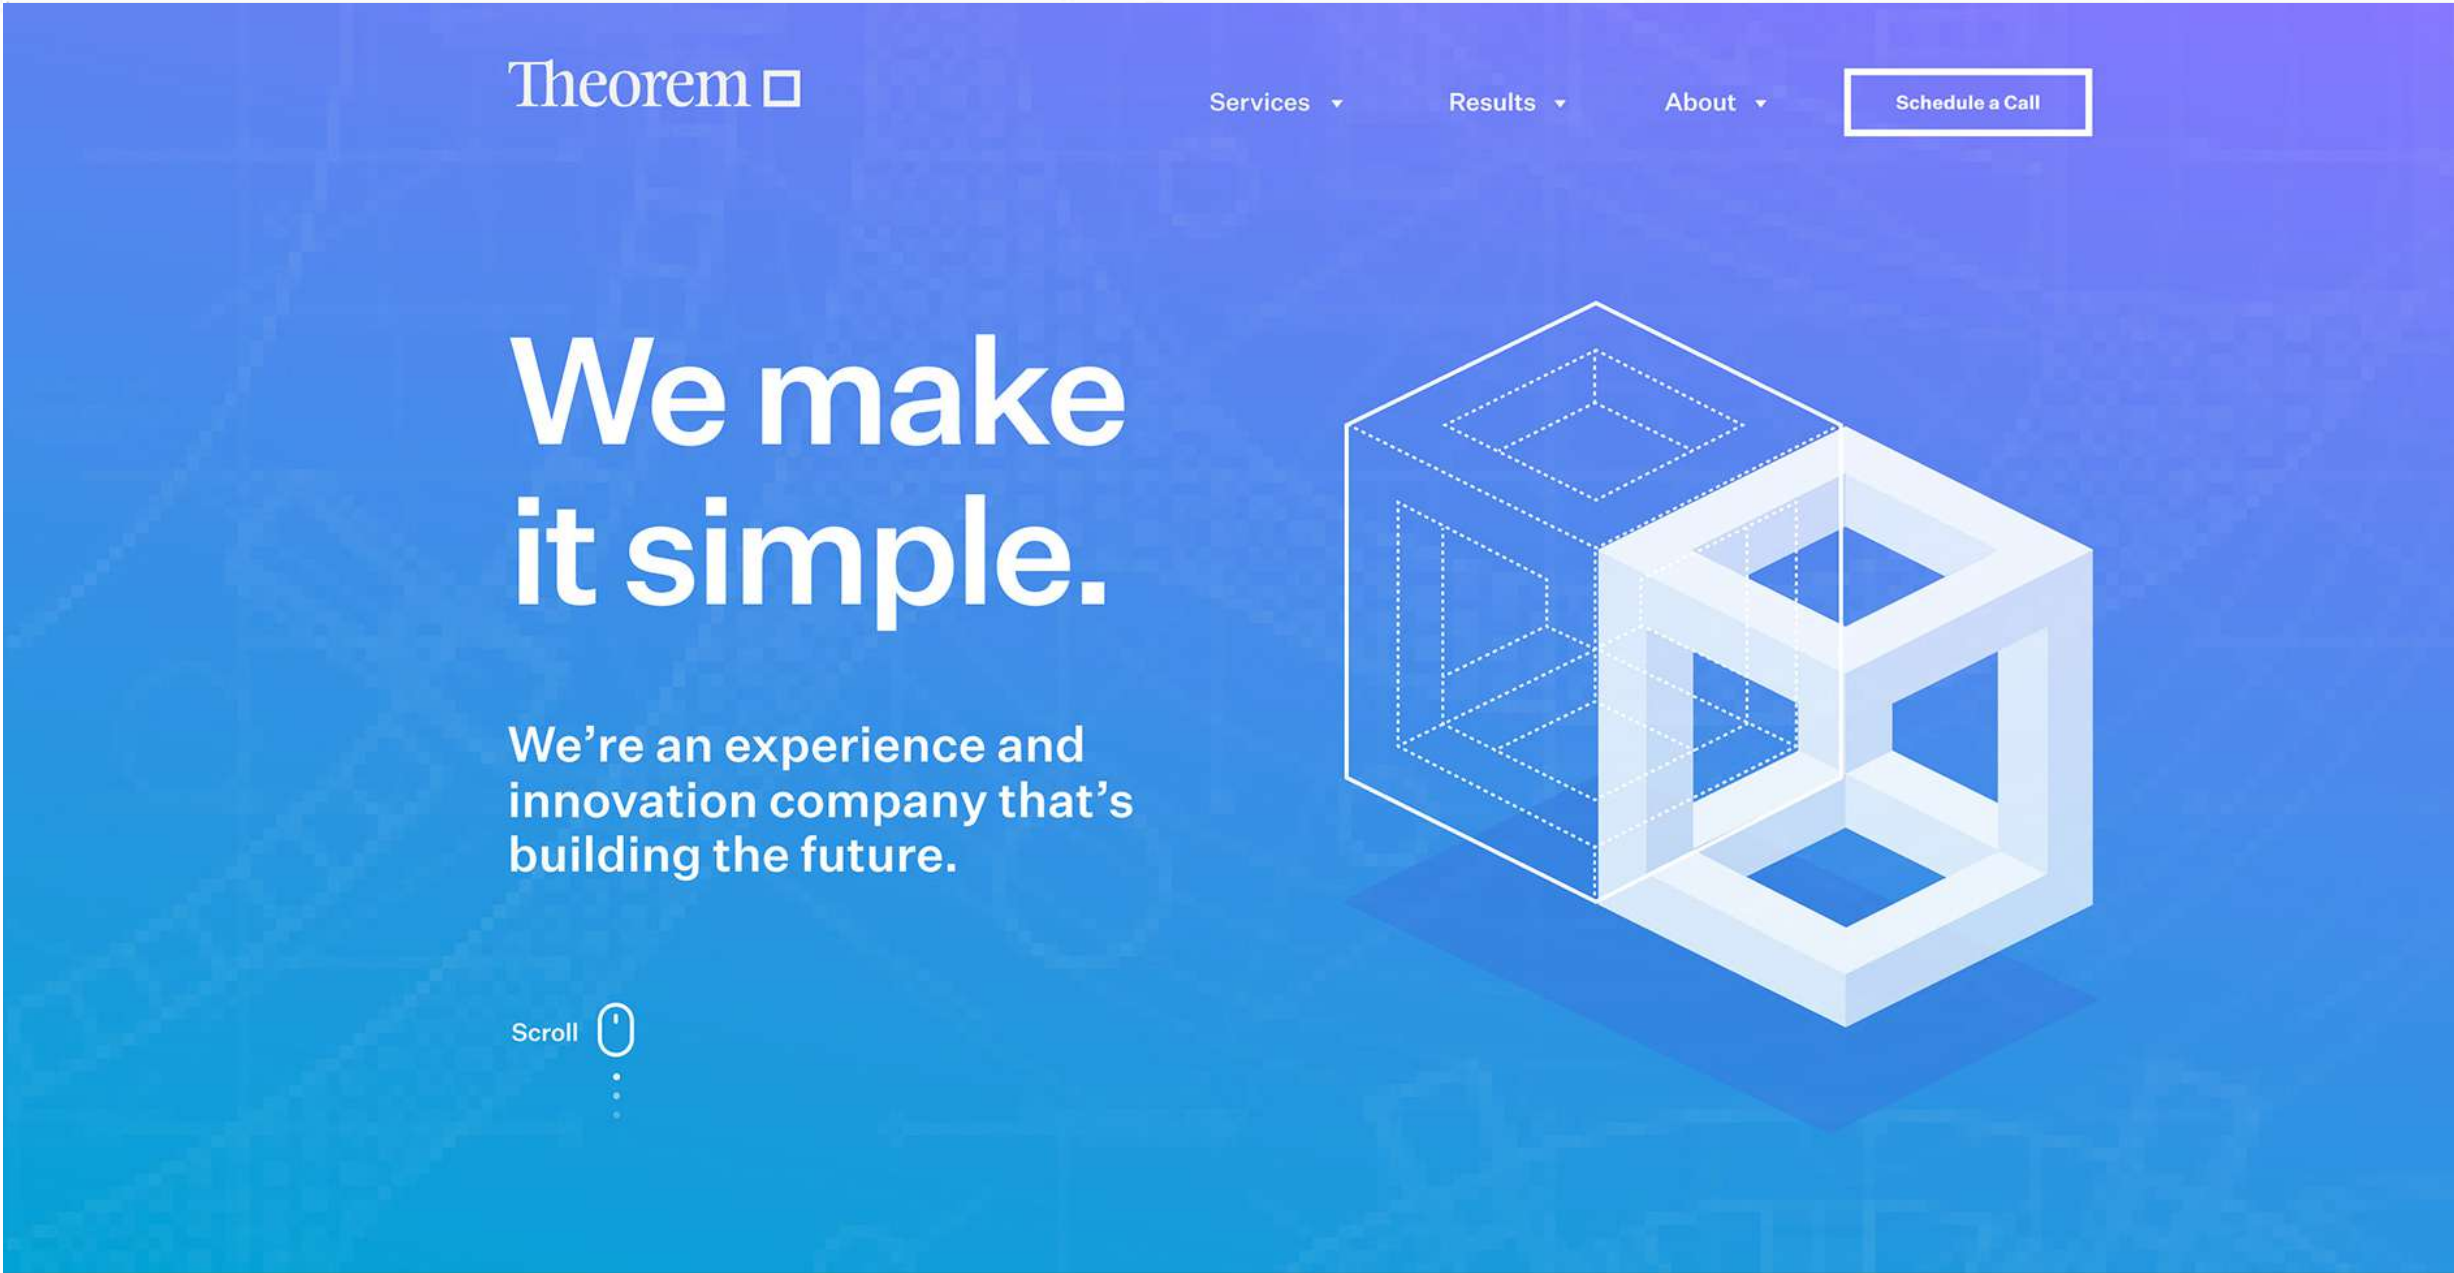

Responsive Web

# Theorem

## Custom enterprise solutions

Sometimes even the highest caliber software development firm can use a little help. In this case, Theorem – which traditionally operates with 8-figure budgets while servicing industry titans such as AT&T, American Express, and UPS – was ready to reintroduce its brand to the market. This kicked off with a total website overhaul, which required TLC from a firm that specialized in implementing beautiful, rich design and intuitive front-end experiences. Enter Expedition Co.

Fast & reliable.  
We get it done.

From concepts to engineering, to long-term support, we build it fast & right, the first time.

If the specific requirements are technical then we'll build teams with those technical capabilities, for example Java, .NET or.

# Brady Brim-Deforest

Chief Executive  
Officer

All companies  
are becoming  
software  
companies.

The barrier to entry is decreasing for all industries.

34% of people would prefer to bank with Apple.

Amazon is going head-to-head with logistics providers.

## The first open platform built to enable end-to-end connected device solutions.

### Challenge

AT&T challenged us to build the world's most powerful IoT platform. They enlisted Theorem to help expand their current offering by delivering a groundbreaking IoT platform capable of managing millions of devices and billions of datapoints across their global network.

### Outcome

- In 9 months, an IoT platform capable of processing billions of datapoints each week.
- Platform managing one of the largest commercial fleets in the United States.
- Flexible development team scaling from 7 to 60+ members depending on needs.

### Results

8 Products & Components  
Designed to seamlessly work  
together.

70K+

Connected pieces of  
hardware.

4B

Real time data  
transaction through  
the platform we built.

# Results that increased the bottom line.

**\$1B**

In slack removed by  
outbound supply chain.

**68%**

Improvement in delivery  
times from manufacturing  
plant dealer.

**22+**

CNP point improvement in  
under 6 months.

# Carmine

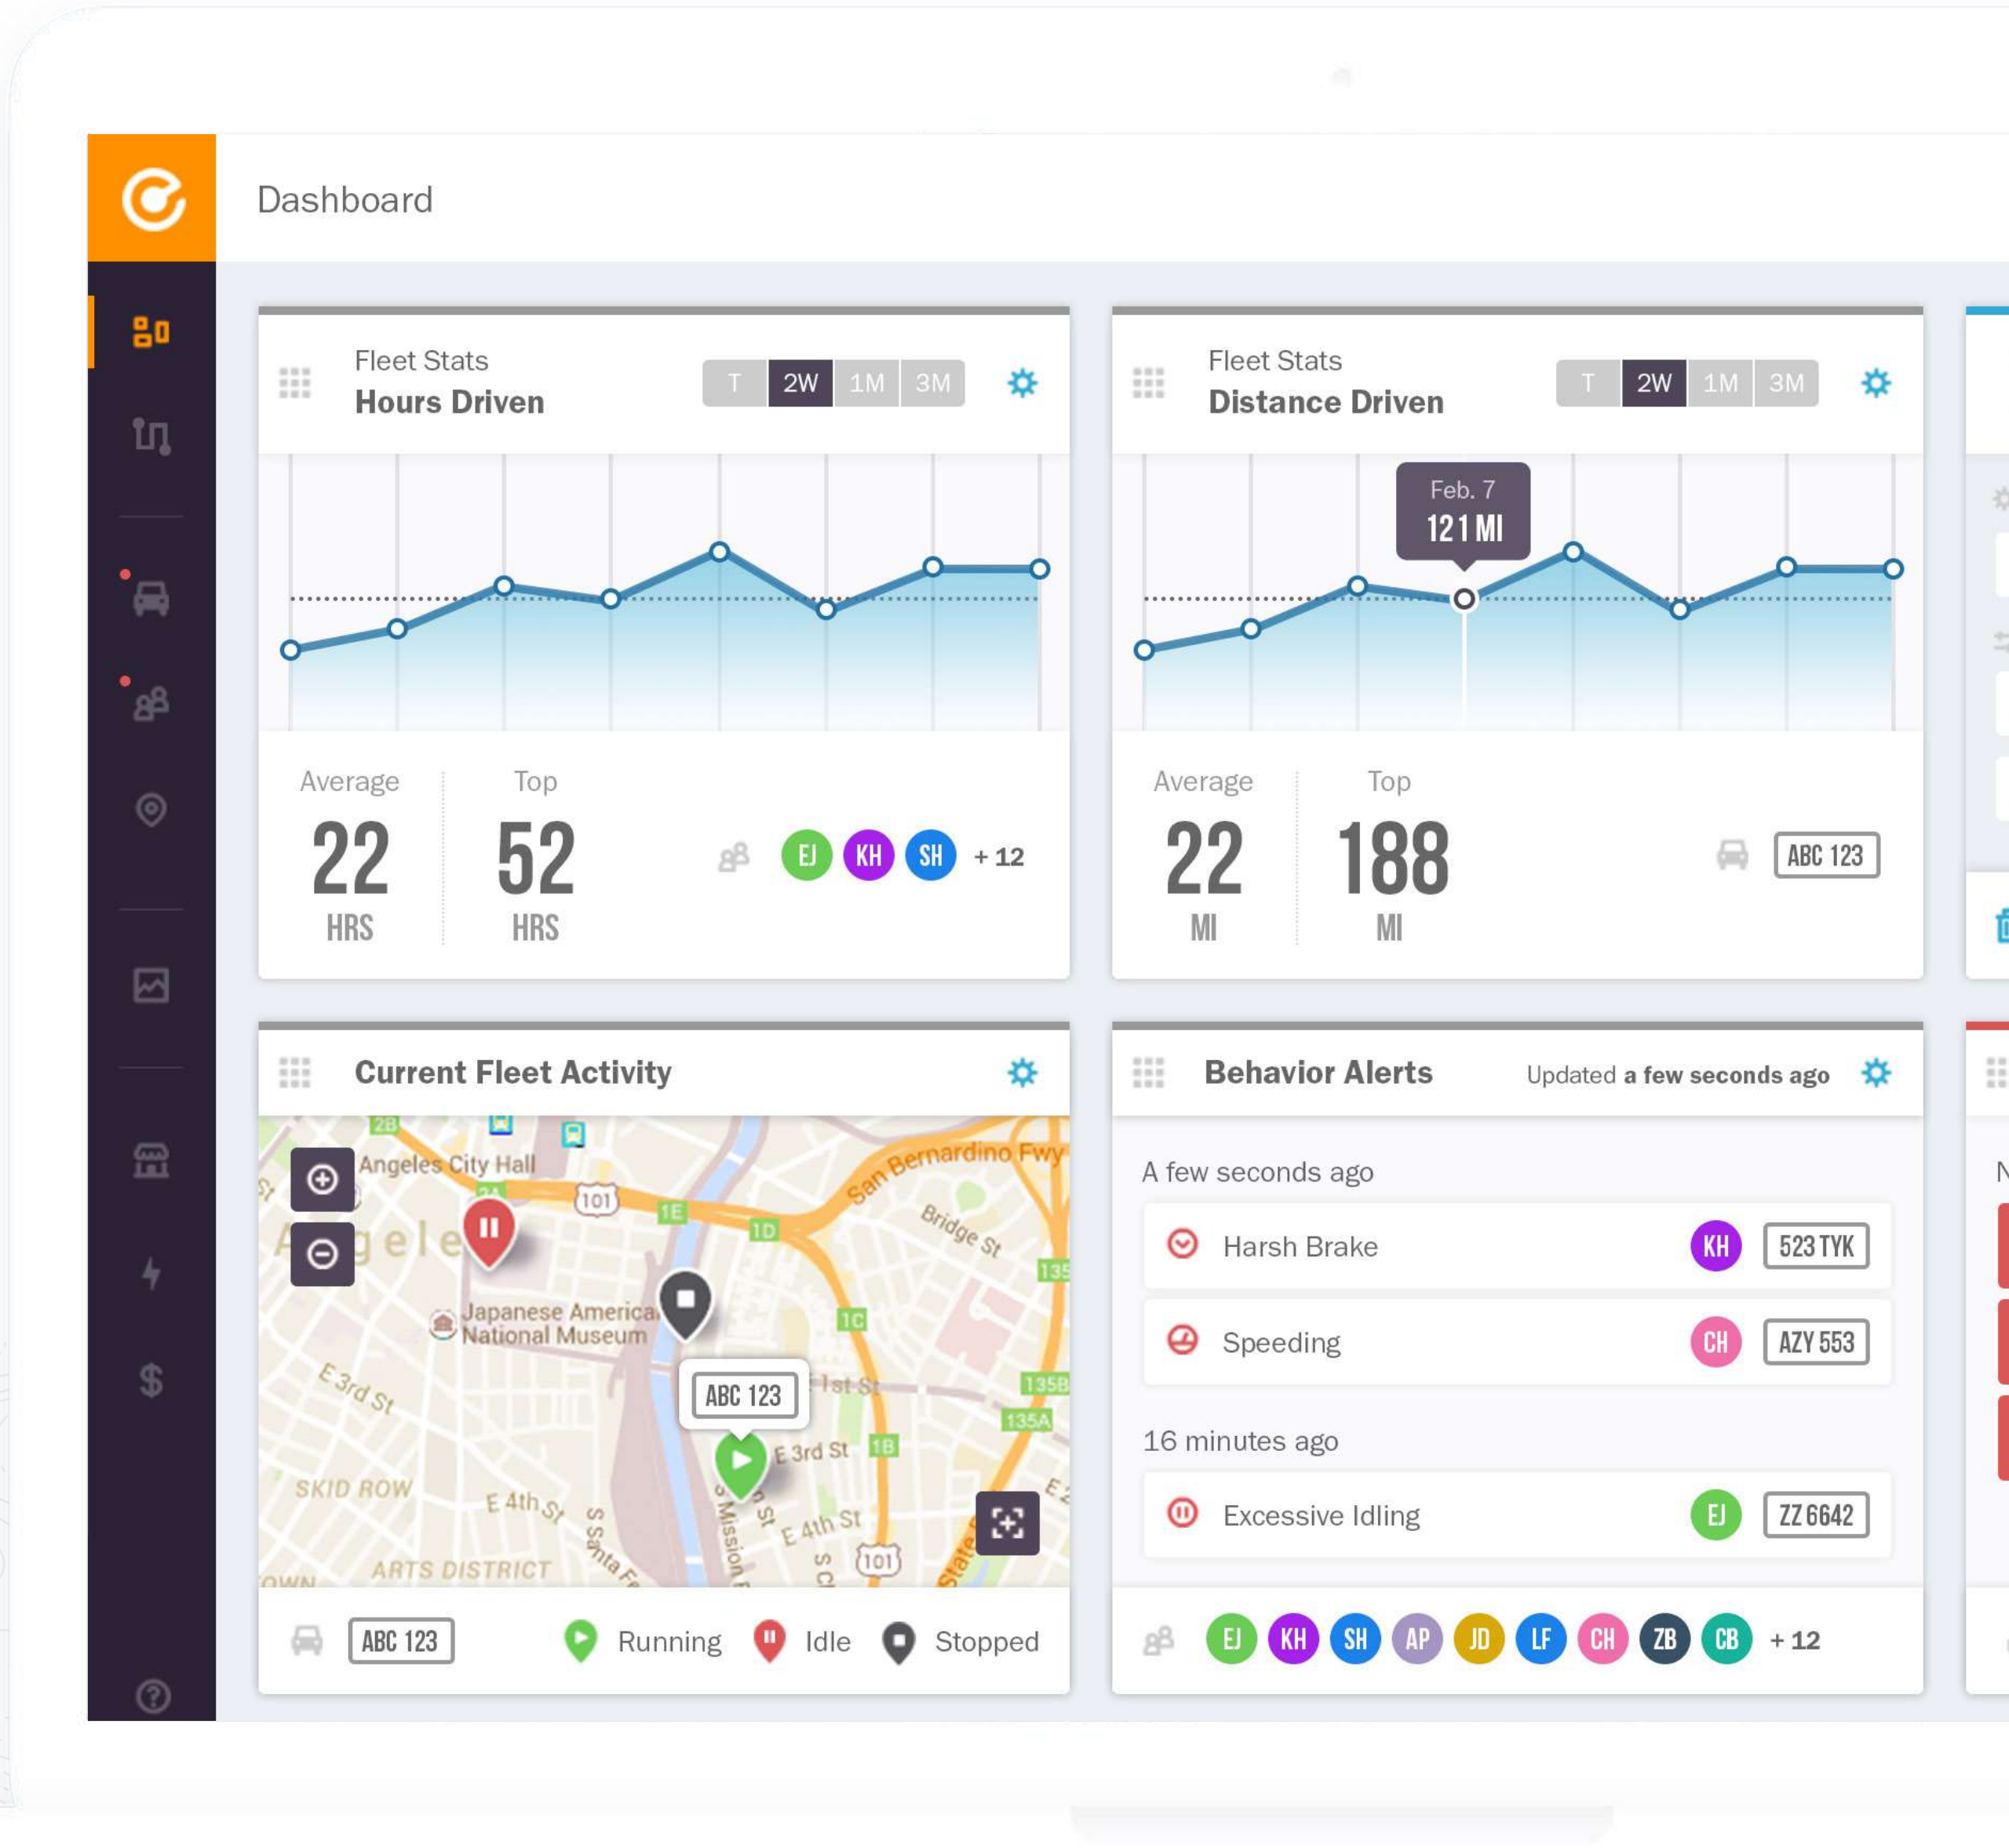

Web, iOS, Android

# Carmine

Total insight, total control

With a similar business model already proven successful in the Netherlands, Carmine’s Danish parent company, Unigrid, brought its fleet management technology to America. To penetrate this industry’s dense US market, Expedition Co. was hired to overhaul this SaaS platform’s feature set and implement an entirely new and modern user–experience.

# Moffatt & Nichol

Responsive Web

# Moffatt & Nichol (in development)

## Forged In Steel

While deep into our Discovery phase with M&N's key stakeholders, it became abundantly clear to us that this wasn't going to be your average marketing site. Rather, the purpose of this website overhaul would be to satisfy the need for two very specific visitor types (personas) to obtain the information they need quickly, clearly, and without any hanging questions. It will be these two personas that – once satiated – will have a dramatic, positive impact on M&N's growth trajectory and ability to expand into new international locations.
